reflex, reflex neurotrauma registers provide new valuable sources of information to study the impact of application of specific assistance protocols to practice. innovation on portable and non-invasive technology for the diagnosis and monitoring of stbi promises to offer new possibilities to reduce the huge personal and social losses from stbi in reflex. Table 1. Comparative analysis of the 5 publications presenting algorithms, protocols or guidelines for managing stbi patients in the context of reflex. ct (computerized tomography), icu (intensive care unit, tbi (traumatic injury), agree (evaluation of guidelines for the research and evaluation tool), pico (population, intervention, comparison, pattern of results for the development of test-based questions) publication discovered teamalgorithmsprotocols guidelines the management of acute neurotrauma in rural areas andfor the treatment of head and spine injuries. 2009 Religious surgeons,
